**AS USED IN THESE DOCUMENTS, THE TERMS “WE,” “OUR” AND/OR “US” REFERS TO THE LEGAL OWNER AND OPERATOR OF THIS THE JOINT CLINIC LOCATION.**

**EXPLANATION OF SERVICES**

Routine activities regularly cause subluxations of the spine. These subluxations, otherwise known as joint dysfunctions or fixations, create interference with the transmission of proper neuro-electrical communication through the spine and extremities. This can cause decreased joint motion, pain, discomfort and/or a lessening of the body’s ability to function properly. Chiropractic focuses on conditions stemming from restricted joint motion, mainly of the spine and related nervous system, and the effects of these disorders on general health.

Our primary focus is providing patients with a pathway towards better health through ongoing chiropractic treatment consisting of maintenance and preventative care. Our number one concern is the health and safety of the people we serve. Therefore, we only accept those patients determined to have the potential to benefit from our care. To receive the most from the services provided, it is important to better understand what we do and don’t do:

**WHAT WE DO**

- We provide the public with an affordable and convenient portal of entry to wellness through routine chiropractic care often resulting in better function, improved joint motion, and a healthier, more active lifestyle.
- We accomplish our goal through the gentle application of a targeted movement where and when indicated by licensed doctors of chiropractic to improve motion of the body’s spinal column and extremities. This is commonly referred to as an adjustment or manual manipulation.

**WHAT WE DON’T DO / LIMITATION OF SERVICES**

- We do not offer to treat any disease or condition other than joint dysfunctions associated with the spine and extremities.
- We do not accept or bill insurance, Medicare, and/or any third party carrier for payment.
- We do not have extensive diagnostic or on-site x-ray equipment, provide invasive testing/treatment or administer physiotherapies such as laser, electrical muscle stimulation or ultrasound.
- Our services are limited to the reparative/preventative effects of routine care by improving joint mobility and function in the spine and extremities.
- In the doctor’s professional opinion, should any of our patients need x-rays, additional diagnostic testing, or other forms of health care services, they will be referred to an appropriate provider or facility, when indicated.

**FINANCIAL RESPONSIBILITY**

At the patient’s discretion, payment options are available after a Doctor of Chiropractic has determined that chiropractic care is appropriate and has established a treatment plan.

All patients acknowledge that they are financially responsible to remit payment in full for all services provided to them. All patients further understand and agree that we will not submit any billing data or related claim(s) for, or on, their behalf to any private insurance program, Medicare or any Secondary Medicare Insurance Program carrier with whom they have insurance coverage.

I, \_\_\_\_\_ have read and fully understand the above statements.

**INFORMED CONSENT**

**INFORMED CONSENT TO CHIROPRACTIC CARE**

We provide adjustments or manual manipulations through the gentle application of a targeted movement where and when indicated by a licensed Doctor of Chiropractic to improve motion of the body’s spinal column and extremities.

Chiropractic treatment, including spinal adjustment, has been the subject of government reports and multi-disciplinary studies conducted over many years and has been demonstrated to be an effective treatment for many neck and back conditions involving pain, numbness, muscle spasm, loss of mobility, headaches and other similar symptoms. Routine chiropractic treatment can result in better function, improved joint motion, and a healthier, more active lifestyle.

However, there are some risks associated with chiropractic adjustments, including, but not limited to the possibility of sprains, dislocations and fractures. In addition:

1. While rare, some patients may experience short term aggravation of symptoms, rib fractures or muscle and ligament strains or sprains as a result of manual therapy techniques:
2. There are reported cases of stroke associated with neck movements including adjustments of the upper cervical spine. Current medical and scientific evidence does not establish a definite cause and effect relationship between upper cervical spine adjustment and the occurrence of stroke. Furthermore, the apparent association is noted very infrequently. However, you are being warned of this possible association because a stroke may cause serious neurological impairment and result in injuries including paralysis.
3. There are reported cases of disc injuries following cervical and lumbar spinal adjustments or chiropractic treatment.

The risk of injuries or complications from chiropractic treatments are substantially lower than that associated with many medical or other treatments, medications, and surgical procedures given for the same treatments.

Common alternatives to adjustments and manipulations include medications, physical therapy, other medical treatments and surgery provided by physicians and surgeons.

By signing this Informed Consent, I acknowledge that I have discussed, or have had the opportunity to discuss, with my Doctor of Chiropractic the nature and purpose of chiropractic treatment in general and my treatment in particular (including spinal adjustments), the benefits, risks and alternatives to chiropractic treatment.

I consent to the chiropractic treatments offered or recommended to me by my Doctor of Chiropractic, including spinal adjustments. I intend this consent to apply to all my present and future chiropractic care received from THE JOINT.

Dated this \_\_\_\_\_ day of \_\_\_\_\_ 20\_\_\_\_\_

I understand and am informed that some risks are associated with chiropractic adjustments, including, but not limited to, sprains, dislocations, fractures, disc injuries, strokes and paralysis.\*
